To Whom It May Concern:

I would highly recommend Legacy Group for all of your furniture product and service needs.

Our design firm suggested Legacy Group to us as we began building out our new office space. With only 48 hour notice, they were the only company who could tear down 60+ existing cubicles in one day over the weekend.

Legacy Group inventoried all parts and pieces of our cubicle furniture in a short amount of time and then worked quickly and diligently to reconfigure the furniture to meet our needs. During our remodel project we also worked with another furniture dealer recommended by our design firm and found Legacy Group to be more responsive, less expensive and more fun to work with.

Since no one in our company was by any means a furniture expert, we relied on Legacy Group and found that they did an excellent job of creating realistic expectations with our team. The remodel was completed on time and just before the holidays. And to top it off, Lou even threw in a ping pong table for our associates!

As we need to build out more offices/cubes and manage our furniture inventory offsite, Legacy Group continues to provide excellent customer service. They are an all encompassing furniture product and service company that never fails to deliver.

Best Regards,
